

Belt Positioning Booster Seats (4 - 8 years+)

- Always in the back seat (if possible)
- Should only be used with a lap and shoulder belt
- Shoulder portion should cross chest, not behind the back or under the arm
- Lap portion should sit low on hips, not the stomach
- Recommended until child has outgrown height or weight limit AND can sit comfortably with knees bent over the vehicle seat with shoulder belt crossing the chest and lap belt resting low on the hips
- Booster Seats:
 - 3-in-1 (rear facing to forward facing to booster);
 - Combination (forward-facing with harness to booster);
 - High-back Belt Positioning Booster;
 - and Backless Booster
